

Delta Engineers, Architects, & Land Surveyors, P.C.

Delta Engineers & Architects, PC Acquires Snyder Engineering & Land Surveying, LLP

Delta Welcomes the addition of our new Civil Engineering and Survey Team Members

We are a seamless extension of our clients' organizations

Delta Engineers, Architects, & Land Surveyors, PC proudly welcomes Snyder Engineering & Land Surveying to our team!

Delta Engineers, Architects, & Land Surveyors, PC (Delta) recently acquired Snyder Engineering & Land Surveying, LLP (Snyder), an Oneida County based Engineering & Land Surveying Firm located in Vernon, New York. Snyder has been providing engineering and land surveying services for the past 17 years to the Central New York region.

Snyder is a thirteen (13) person firm with two (2) registered Professional Engineers (PE), one (1) registered Land Surveyor (LS), and (1) Engineer in Training (EIT). Their projects have included land surveying and design of residential subdivisions, subsurface sewage disposal systems, site and soil appraisals, boundary surveys, topographic surveys, construction stakeout services, building location surveys, and flood plain elevation certificates.

Bruce Snyder, LS (co-founder of Snyder) is a registered land surveyor with over thirty years of experience. Snyder Engineering was the key land surveyor on several large scale projects including the Oneida Indian Nation Casino & Resort Complex; Sav-On Gas Stations; Fairfield Inn & Suites Hotel and Recovery Room project; Consumer Square Shopping Center; the Southern Onondaga County and Village of Vernon Water projects; the City of Utica Municipal Hope Housing projects; topographic and boundary surveys for the City of Utica Engineering Department; Lowe's projects in Oneida, Potsdam and Herkimer; Fastrac Markets throughout Central New York; as well as construction stakeout services for Syracuse University, Colgate University, Hamilton College, Cortland College, and Herkimer College to name a few.

Floyd Snyder, PE, (co-founder of Snyder) also joins Delta as a consulting engineer. Floyd has over 50 years experience in land surveying and engineering design, including twenty-nine (29) years as Syracuse Division Engineer for the New York State Thruway Authority. Floyd's experience is in the field of highway design, bridges, heavy construction projects, and storm water management.

Snyder compliments Delta in many ways including an excellent client base, great reputation, and most importantly, the quality of documents. With the acquisition of Snyder Engineering & Land Surveying, Bruce has also become a principal of Delta.

Effective July 1, 2009, Delta's new name has become Delta Engineers, Architects, & Land Surveyors, PC.
