

Delta Engineers & Architects, P.C. provides philanthropic design services for the Whitney Point Ecumenical Food Pantry

St. Patrick's Church Food Pantry Opening Ceremony

Delta Engineers & Architects, P.C. assists with the design of the Whitney Point Ecumenical Food Pantry

Delta Engineers and Architects, PC (Delta Engineers) recently had a unique opportunity to give back to a community that many of our employees call home. St. Patrick's, a local church in Whitney Point, was in need of a new building to house their food pantry operations which had out-grown its current space in the rectory. Local businesses, residents, and clubs raised money for the construction of the building. Delta Engineers volunteered by providing structural, mechanical, electrical, and architectural design services for this project.

The new food pantry, housed in a single story, vinyl sided building is located adjacent to St. Patrick's Church. The facility is now open for use and has ample food storage space to allow the church to better serve the needs of the community.

Father Katz states: "We welcome the gifts of those who share our belief that no one among us should go hungry." If you are interested in donating to this worthwhile cause, please contact:
