

Spill Prevention Containment & Countermeasure (SPCC) Plans Is Your Facility in Compliance?

Delta's Project Engineer and SPCC Program Coordinator, *James Toft*, has more than 20 year experience and holds a Bachelor of Science degree in Industrial Technology as well as an Associates Degree in Civil Engineering Technology. Jim can both assist you in determining if your organization is in compliance with the EPA Regulations and work with you to get an effective SPCC Plan in place for your facility. If you would like to speak to Jim in regards to your SPCC Plan or where to get started, please contact him at (607) 352-1697 or through email at jtoft@deltaengineers.com.

Do the SPCC rules set forth by the Federal EPA apply to your facility?

If your facility stores more than 1,320 gallons of Petroleum Products on site, you may need to have a Spill Prevention Containment and Countermeasure (SPCC) Plan prepared and in practice. This is in addition to the Permits and Certificates your State may require. The deadline is approaching fast for facilities to comply.

While most States take an active role in regulating the storage of petroleum products and overseeing cleanup of spilled materials, the United States Environmental Protection Agency (EPA) takes a pro-active approach. The Agency requires facility operators to have written plans in place to **Prevent** leaks and spills, **Contain** them in the event of a discharge and have **Countermeasures** in place to deal with incidents involving spills or leaks that have a potential discharge of oil into public waters.

Delta Engineers Civil / Environmental Department has the expertise and experience to evaluate your facility to determine if an SPCC Plan is required. In addition, **Delta** can walk your organization through the regulatory requirements and assist you in developing a Spill Prevention Control and Countermeasures Plan that is specific to your facility needs and operation. **Delta** can also provide on-site training to assure your SPCC program starts out on a solid foundation.

Delta recently completed a program with Delaware County, New York to bring all of their County owned facilities into compliance. We welcome the opportunity to work with you to implement an SPCC Plan for your facility.
